Profile Summary

Motivated and detail-oriented frontend developer focused on creating clean, responsive, and visually engaging websites and applications. Experience with WordPress maintenance (Elementor, Avada, WooCommerce) and frontend technologies (React, JavaScript, Tailwind). Open to freelance and part-time roles in Serbia and remote.

Skills & Technologies

- HTML, CSS, JavaScript (ES6+), React + Vite, Tailwind CSS
- WordPress (Elementor, Avada), WooCommerce, product feeds
- Git/GitHub, SEO basics, responsive design, basic backend tasks

Services

- WordPress website maintenance: content updates, speed optimization, security, weekly support
- WooCommerce product sorting, custom attributes, and feed integration for Google and Facebook
- Frontend development with React and Tailwind: custom components, UI enhancements
- Consulting and small business site audits

Selected Projects

- Weather App – Real-time weather data with clean UI:
ivanvaic99.github.io/portfolio-vaic/projects/weather
- BMI Calculator – Fast and simple BMI calculation tool
- Notes App – CRUD notes stored in local storage
- Password Generator – Strong password generator with custom options
- Gradient Generator – Instant CSS gradient creation
- Gallery – Responsive gallery with modal view

Experience

- Weekly maintenance (4–5 hours) of two WordPress/WooCommerce websites using Woodmart theme and Elementor
- Creating custom backend pages for product display based on categories and attributes
- Product feed integration for Google and Facebook, sorting products by categories and attributes

Career Goals

Seeking opportunities to contribute as a frontend developer and WordPress specialist, focusing on website maintenance and improvement for businesses in Serbia and abroad.
